## PFEIFFER TECHNOLOGY & INNOVATION LAB

### NEW Fall Programs!

#### CUT and SEW PROGRAM

Popular in the early 20th century in Kingston, SUNY Ulster introduces a modern Cut and Sew Microcredential for entrepreneurs as well as for the cut and sew manufacturing companies building their roots in the Hudson Valley.

#### CNC PRE-APPRENTICE PROGRAM

Inspired by the Uniquely Able Project in CA, SUNY Ulster has been awarded grants funds to partner with The Arc Mid-Hudson to train in the high-demand field of CNC. Using lessons learned from the Uniquely Able Project, SUNY Ulster's goal is to change the way the community thinks and talks about disabilities, specifically in regards to the autistic community and promote a more inclusive approach to education and employment. The program will prepare students for entry-level careers that are in high-demand and offer good starting salaries. The program focuses on a student's strengths. It has been observed that jobs requiring individuals with a high degree of focused attention to detailed repetitive processes, able to follow clear objective instructions, and familiarity with computers are well suited for a person with high functioning autism. Scholarships are available for those enrolling in this program.
